Waves Audio, a developer of professional audio signal processing technologies and plugins, announces a new version of the eMotion LV1 Live Mixer. Updates include compatibility with the new MixMirror app, offering full iOS tablet remote control for the Waves eMotion LV1 Live Mixer and Waves SuperRack. In addition to MixMirror control, Waves' new update for the eMotion LV1 Live Mixer incorporates several other new features: extended gain mapping options for Waves' FIT Controller for eMotion LV1 and Waves MyFOH apps; a new mix bus input fader mode; updated menus for improved touch usability and various bug fixes across all applications.

With Waves' MixMirror (iPad and Windows only), FOH engineers can now control plugins from any location within a venue. MixMirror is a zero-hassle remote application that efficiently mirrors and optimizes your mixer window from either the eMotion LV1 or SuperRack (compatible with both SoundGrid and Performer) onto your tablet device. The application has been tailored for the most practical and functional mixing experience possible. You can now walk around the venue with full console and plugin functionality – allowing adjustment of EQ moves as you tune the speakers, solve room issues remotely, and tweak FX levels from anywhere in the room.

Waves MixMirror features:

- Control eMotion LV1 mixer & SuperRack from anywhere in the venue
- Remote control for all plugins in your live mix
- Zero setup hassle simply plug and play
- · Compatible with iPad tablet devices
- Solve room & feedback problems remotely
- Make faster & more confident mixing decisions
- Adjust setup and configuration seamlessly

The Waves eMotion LV1 Live Mixer is the pinnacle of the modern-day mixer, bringing pristine sound quality to any show, venue, broadcast room or streaming event. The LV1 boasts up to 64 stereo channels of unmatched audio quality, with full plugin integration and complete customizability for any workflow. Powerful and scalable, LV1 can share up to 16 I/O devices and connect to multiple DSP servers for unlimited mixing power - all with flexible control, both tactile (up to 32+2 faders) and touch-based. The LV1 Live Mixer gives you the luxury of mixing live with the massive Waves plugin catalog, offering unparalleled integration with the same award-winning tools powering GRAMMY-winning studio recordings. To download the free Waves MixMirror, go to Apple App store.
