

PreSonus and Antares Partner to Offer Three-Month Subscription to Auto-Tune Unlimited

PreSonus and Antares announce that starting March 1, 2021, PreSonus customers who purchase and register any new PreSonus mixer or interface (including the ioStation 24c and Revelator) will receive a free three-month subscription to Antares' industry-standard Auto-Tune Unlimited vocal plug-ins. Of course, PreSonus mixer and interface customers will continue to receive the Louisiana company's popular Studio One Artist recording and production software and Studio Magic Software Suite, as well.

Auto-Tune Unlimited includes every edition of Auto-Tune, as well as a suite of professional vocal production tools, such as Harmony Engine, Articulator, and all of the other plug-ins found in the Antares AVOX bundle. It is also available by paid subscription from Antares.

"Antares Auto-Tune is legendary; it really needs no introduction," observes PreSonus Senior Vice President of Global Sales Rick Naqvi. "I use it in my studio, like many producers, including top professionals, engineers, and artists. We're thrilled to be able to offer it to our customers. Once you've used Auto-Tune Unlimited for three months, you won't want to be without it."
