Audient iD44 MKII

Bringing its most powerful desktop audio interface, iD44 into line with recent product upgrades, Audient announces the launch of iD44 (MKII).

"As far as audio performance was concerned, iD44 was already fully spec'd," says Andy Allen, Audient's marketing director. "Yet we saw an opportunity to make the best better: making a major improvement to the all important ADC's, incorporating additional must-have features and styling it with a beautiful new smoke-grey finish. All at the same price, delivering yet more value to our customers!"

The ADCs' THD+N figure sees a 9dB improvement, representing an astounding step up in audio performance for the iD44 (MKII). "That's super clean audio with less added noise and even less audible distortion," says Andy.

iD44 (MKII) now also benefits from the addition of Audio Loop-back, so users have the ability to capture playback from multiple applications on the computer at the same time as the microphones - ideal for content creators, podcasters and streamers.

The incorporation of a dual headphone amp - including both a ¼" jack and a mini-

jack, means three sets of headphones can be plugged in at once - as well as the makeover of the unit's all-metal aesthetic, complete the key upgrades.

Andy continues, "The combination of these enhancements alongside four Audient Console mic preamps, class-leading converters, ADAT expandability and balanced inserts means iD44 (MKII) really does deliver the audio performance of an Audient console straight to your desktop, and ensures with iD44, our customers get a professional grade audio interface without breaking the bank."

iD44 (MKII) is expected to ship in June 2022 and will retail at the same price as its predecessor: £499.99, €599 and $699.

Features:

- 4 x Class-A Audient Console Mic Preamplifiers
- Class Leading AD/DA Converters
- 2 x ADAT Inputs & Outputs for Digital Expansion
- 2 x Discrete JFET Instrument Inputs
- 2 x Fully Balanced Inserts
- 1 x Independent Headphone Output
- 1 x Independent Dual Headphone Output
- Main and Alt Speaker Outputs
- Audio Loop-back
- ScrollControl
- 3 x User Defined Function Keys
- Dedicated Talkback, Dim and Cut Controls
- +48V, Pad, and HPF Switches
- Ultra-low Latency DSP Mixer
- Word Clock Output
- Standalone Mode
