

Erica Synths LXR Drum Module

LXR eurorack module is a compact and great-sounding percussion synthesizer based on the sound engine of the LXR-02 drum machine. While retaining the core interface of the LXR-02, this module adds the essential eurorack ingredient - assignable CV control over parameters and many more tweaks in the user interface for better integration in any eurorack system.

Features

- 6 drum/percussion voices
- 7 trigger inputs with accents
- 5 assignable CV inputs

Erica Synths introduces the LXR Drum Module for eurorack systems

Donnerstag, 08. September 2022 17:43

- 4 assignable outputs
- 3 voices can be used as basslines due to 1V/oct tuning
- Over 30 adjustable parameters per voice
- Insert FX section
- Kit memory
- SD card for Kit exchange and easy firmware updates
- Kits compatible with the LXR-02
