Arturia V Collection 9.1

To keep users' creativity fresh and their inspiration flowing, Arturia is always on a mission to improve and enrich their hardware and software with regular updates.

Explore the improvements, tweaks, and performance fixes to give V Collection 9 users the personal, inspiring, and enjoyable virtual sound exploration they deserve:

- New sound design tutorials for KORG MS-20 V, Prophet-5 V, CS-80 V, and SQ80 V
- Analog Lab polyphony, MPE, and Vocoder V enhancements
- Universal browser keyboard shortcuts and voiceover feedback compatibility
- MiniLab 3 V Collection instrument integration
- Enhanced tagging & playlist customization
- Arturia Software Center (ASC) custom resource location
- V Collection NKS certification
- Performance & bug fixes
