

Fiedler Audio 3D Reverb Spacelab Update

Features direct feed into Dolby Atmos Composer, new automation and routing

Fiedler Audio, German reverb professionals and specialists for „space-in-audio creation tools“ today announced the immediate availability of Spacelab 1.5, another significant update to Fiedler’s acclaimed 3D Reverb developed in cooperation with Fraunhofer Institute. Spacelab 1.5 now seamlessly integrates with the Dolby Atmos Composer. This means that the community of immersive audio creators now can access a 3D Reverb plug-in that feeds directly into the Dolby Atmos mix.

The following features have been added to both Spacelab Interstellar and Spacelab Ignition 1.5:

- Seamless integration with Dolby Atmos Composer

Fiedler Audio releases 3D Reverb Spacelab Update

Montag, 04. September 2023 17:26

- LFE Handling - LFE signals at the input will be handled properly and passed through to the output speaker layout. Spacelab's speaker layout editor allows for freely assigning LFE(s) to the respective channel(s).

Reworked Binauraliser Algorithm

- Better and smoother 3D panning plus 2 additional new spaces . The options Space - R, Space - E and Space - O and the new Spaces A1 and A2 offer different overall tonal characters. Depending on the content now there is a choice for getting the best possible room response for monitoring and binaural production.

Native Apple Silicon Support

- Mono Switch in Spacelab Beam addresses unwanted stereo operation forced by some DAWs (eg. Ableton LIVE, Reaper, BitWig)
- Open Beam Editor directly from Spacelab
- Beam Manual Delay Compensation on all DAWs - Allows for manual compensation of latency issues in buggy hosts (Logic Pro X, Pro Tools)
- And a number of minor bug fixes

Only available in Spacelab Interstellar 1.5

- Automation in Beam - Source parameter automation possible on each track with inserted Beam plug-in. This allows for moving automation data with audio regions if further project editing is required.

Available from the website below. Spacelab Interstellar costs Euro/USD 599,- and Spacelab Ignition comes for Euro/USD 249,- The update is available to all registered owners of Spacelab Interstellar and Spacelab Ignition for free.
