

UDO Audio Super 8

UDO Audio introduces the next evolution in the Super series. At the core of the Super 8 is two independent binaural analog-hybrid synthesizer signal chains using UDO's proprietary and proven synthesizer technology. With up to 16 voices of polyphony and two unique timbres each with their own independent effect chain, this instrument is analog reimagined. Like its larger sibling the Super Gemini, voices and timbral layers can be split, dualled, sequenced all at the touch of a single control.

Powered by complex FPGA digital oscillators, the Super 8 is decorated with expansive tonal features such as wave morphing, cross & ring modulation, bi-directional sync and an all-analog signal path to the output, inspired by the analog polysynth heavyweights of lore. Equipped with a 61-note semi-weighted keyboard with polyphonic aftertouch, left hand performance controls and 256 performance and patch slots, 32 interchangeable waveforms and 16 sequences, the Super 8 balances power, playability and performance.

Sitting in between the Super 6 and the Super Gemini in size and power, the Super 8 puts the player first using high quality tactile control elements with our user-centric intuitive design philosophy that inspires exploration and sonic play. Adopting a similar true-stereo Binaural signal path with dual FPGAs and twin effects processors like the Gemini, and yet retaining the portability and road-friendly personality of the Super 6. The Super 8 will be a long time friend and partner in your adventures in

sound.

As the next evolution in the Super family, the 16-voice Super 8 sits confidently between the Super 6 and the Super Gemini. This synth is the distillation of the UDO philosophy of the power of play - with the dual cores and playability features of its bigger cousin, all in a more compact and simplified presentation - it's the best of both worlds. The Super 8 allows you to effortlessly transition between two independent synth layers, inspiring textural, deep and rich soundscapes at a touch. With UDO's championed powerful, flexible and immediate sound, this synthesizer is designed to take you on a sonic journey. Using the tried and tested UDO framework of state-of-the-art FPGA digital architecture with archetypal voltage-controlled synthesizer technology, the Super 8 is a harmonious meeting of old and new in ideas and techniques. All contained within a no-expense-spared build with the highest quality components, The Super 8 is an instrument for life.

Price:

- € 3,749
- £ 2,995
- \$ 3,699

Availability:

- First units shipping July 2024

Top-line Specifications:

- 16 voices (8 voice in binaural mode)
- Bi-timbral
- Analog-hybrid
- 61 note semi-weighted polyphonic aftertouch keyed
- High quality control elements

Size and weight

- Instrument: 1040mm × 400mm × 95mm, 13.4kg
- Packaged: 1150mm × 550mm × 230mm, 18.1kg
