

Audio-Technica distributes RF Venue

Audio-Technica has announced a new distribution agreement with Massachusetts-based RF Venue, which will see the company represent the wireless essentials brand across EMEA from 31 January 2023.

Offering a wide variety of wireless mic and IEM antenna, combiner and band-pass filter products, RF Venue is relied on for everything from HOW and fixed installations to touring and other event applications, with a reputation built on more than 10 000 projects since its inception in 2011.

Alexandra Bischof, Audio-Technica Marketing Manager EMEA Commercial Audio said, “We’re delighted to be representing RF Venue throughout EMEA – the company’s portfolio allows us to offer customers an increasing range of wireless solutions alongside our own systems. Their track record of delivering excellent value, efficient problem-solving technology is a great fit for Audio-Technica and we look forward to introducing the brand to our customers across these territories in the coming year.”

RF Venue President Chris Regan commented, “We are excited to grow our relationship with Audio-Technica Europe and to make RF Venue products available to support Audio-Technica wireless systems in the EMEA market. RF Venue wireless Essentials have a proven track record as excellent companion products to Audio-Technica wireless systems.”

Both Audio-Technica and RF Venue will be exhibiting at ISE 2023 in Barcelona (Audio-Technica located at booth 3P450, RF Venue at booth CS60).
