

# Lectrosonics BAGFRAME

Lectrosonics debuts the new BAGFRAME organizers, which are designed to mount portable receivers via specialized accessory kits, and keep these receivers organized in a bag. The new BAGFRAME units are available in several different widths and heights to accommodate a variety of receivers. Two different BAGFRAME widths are available: one for 2 receivers, and one for 3 receivers; while three different heights are available: S (short), M (medium), and T (tall). These kits are shipped ready to be assembled by the customers to make them practical and economical for everyone. All BAGFRAME units are constructed of aluminum alloy, making them very sturdy and tough and yet very lightweight.

The BAGFRAME units use snap-in inserts for all receiver mounting. Some receivers also require screws and mid-frame mounts. Thus, there are specific parts or mounting kits required to mount the receivers. Audio and data connections are all handled per receiver, via whatever audio outputs or backplates are used on those receivers.

The various BAGFRAME units available are:

- BAGFRAME2-S (two receivers, short) 6" from front to back
- BAGFRAME2-M (two receivers, medium) 7-1/2" from front to back
- BAGFRAME3-M (three receivers, medium) 7-1/2" from front to back
- BAGFRAME3-T (three receivers, tall) 8-3/8" from front to back

Mounting kits and parts:

- ZS-BAGFRAME-DSR4-DSR-KIT for mounting DSR or DSR4 receivers.
- ZS-BAGFRAME-SR-KIT for mounting SR Series receivers SRa, SRb, SRC.
- 36022 snap-in bezel for mounting a DCR822 (no other parts required for this receiver).
- 36025 snap-in bezel for mounting a UCR411 or UCR411a in a Bagframe (no other parts required for this receiver).

The Lectrosonics BAGFRAME units are available now. Please contact your authorized Lectrosonics dealer for pricing information.

## Lectrosonics debuts the BAGFRAME Organizers for Receivers
