Satellite Plugins 2.0 available

The screenshot displays the Satellite Sessions interface. At the top, it shows session parameters: BPM (71), Meter (4/4), Scale (E b Major), and Name (Satellites Passing). There are 'INVITE' and 'SETTINGS' buttons. Below this is a timeline with markers at 1, 4, 7, 10, 13, 16, 19, 22, 25, 28, 31, 34, 37, 40, 43, 46, 49, 52, 55, 58, 61, and 64. The interface is divided into tracks for different participants:

- JC Jessy Covets (Host):** Drums (green), Big Drums Midi (blue).
- FM Frank Maroney:** Vox (brown), spice midi (light blue).
- Y Yakov:** Intro (green), Gtr (orange).

Each track shows a waveform or MIDI notation. The interface includes volume faders, solo (S), and mute (M) buttons for each track. There are also zoom in (+) and zoom out (-) buttons at the bottom right.

Satellite Plugins 2.0 is an innovative new VST/AU/AAX plugin that allows users to collaborate on audio projects in any DAW over the internet. Satellite Plugins 2.0 allows musicians to connect to a Satellite Plugins session and contribute audio and MIDI parts. One person can be producing a track in Ableton Live on Windows, while another can be in Logic on Mac, and additional collaborators can join the session in other DAWs. The audio or MIDI recorded into Satellite Plugins 2.0 will automatically sync together between those DAWs on any platform, and can be easily exported. This cutting-edge plugin makes real-time collaborations possible, and eliminates the need for participants involved in the session to use the same DAW or be in the same room.

Satellite Plugins 2.0 is available for free for a limited time.

Features in Satellite Plugins 2.0

- Collaborate with anyone, anywhere, within your own DAW
- Connect any DAW to Satellite Plugins 2.0
- Invite collaborators to your session
- Record audio and MIDI into Satellite Plugins 2.0
- Export audio and MIDI recorded into Satellite Plugins 2.0 to your DAW
- Exchange audio and MIDI without bouncing or using file sharing systems
- Invite collaborators to the session by email
- Assign Host, Co-Host, VIP+, VIP and Viewer permissions to determine who

Satellite Plugins 2.0 available

Friday, 26 February 2021 09:48

can upload/download tracks and invite others to the session

- Choose to make your session public
- Back-up your sessions seamlessly to the cloud

Studio Uses

- Collaborate with musicians, producers and vocalists all over the world, in real-time
- Host a session and invite instrumentalists to record in parts
- Co-write a song with other song-writers
- Reconnect with the musical community
- Generate fresh new ideas for your tracks by writing with others
- Use Satellite Plugins 2.0 in your streams on Twitch and YouTube and invite your audience to collaborate
- Perfect for remote session work, bands, and mixing/mastering engineers

Workflow in Satellite Plugins 2.0

- Open or start a project in your DAW that you want to collaborate on
- Once you have audio or MIDI to share, open Satellite Plugins 2.0 as a MIDI Instrument on a new channel in your DAW
- Add Satellite Audio on any channels you want to use to record audio to Satellite Plugins
- Add Satellite MIDI on any channels you want to use to record MIDI to Satellite Plugins
- Invite your collaborators by email directly from the plugin
- Playback within your DAW any audio or MIDI to share; this uploads the track to Satellite Plugins
- Once your collaborators have joined the session and uploaded audio or MIDI, it'll appear within an instant in Satellite Plugins
- Export WAV files and MIDI out of Satellite Plugins 2.0 by clicking and dragging on the down arrow in the top right corner of the audio files.

Compatible with Ableton, Logic Pro X, FL Studio, Cubase, Studio One, Pro Tools, Reason, Reaper, Bitwig, Garageband and Digital Performer.
