

ISOVOX ISOPOP 24K Gold

Award-winning innovative company ISOVOX introduces its ISOPOP 24K Gold as an exclusive pro-performance pop filter - available as a limited-edition 24K gold-plated brushed aluminium affair aimed at collectors worldwide who have always wanted to make a Gold record with the finest gear in the world... in this case, made in Sweden, shipping with two exchangeable pop filters, and designed to work with any type of

microphone in every scenario, mounting directly on the microphone stand, as well as proving to be a perfect fit for working inside the company's critically-acclaimed ISOVOX 2 vocal booth that instantly found favour with the likes of multi-million-selling British singer-songwriter Seal - as of October 1...

24K gold is considered the purest possible gold available, and any vocalist or voice-over artist needing some such gold in their life need not necessarily turn to jewellery to satisfy their need but rather grab a golden opportunity to invest in their art with ISOVOX's ISOPOP 24K Gold, the world's most exclusive pro-performance pop filter, available as a limited-edition 24K gold-plated brushed aluminium affair aimed at collectors worldwide who have always wanted to make a Gold record with the finest gear in the world. Well, if they get one - an ISOPOP 24K Gold pro-performance pop filter, that is, if not necessarily a Gold record, then they can be sure that they will be one of the lucky few in the world who has - got an ISOPOP 24K Gold pro-performance pop filter, that is.

As a pro-performance pop filter, ISOPOP 24K Gold is sturdy and stays securely in place when clamped to a microphone stand, thanks to its extra-sturdy gooseneck and outer layer of soft skin. Saying that, its non-intrusive (10 cm/four-inch) diameter makes any vocalist or voice-over artist using it more visible to anyone watching them in action while making the user's reading of lyrics or scripts somewhat easier than when working with most other pop filters.

For those who want their sound to be as transparent as possible, ISOPOP 24K Gold comes compete with a Neutral Pro Filter; for those troubled by harsher treble/sibilance caused by below par-performing microphones or, obviously, the voice itself, ISOVOX include an interchangeable De-Ess Pro Filter to soften the sound - both being hygienic and washable.

ISOVOX's ISOPOP 24K Gold is designed to work with any type of microphone in every scenario, mounting directly on the microphone stand, as well as proving to be a perfect fit for working inside the company's critically-acclaimed ISOVOX 2 vocal booth that instantly found favour with the likes of multi-million-selling British singer-songwriter Seal.

So why not bring some serious gold into your recording life with ISOVOX's ISOPOP 24K Gold? Getting a Gold record is far from easily achieved - as Seal surely will attest to, but working with the finest gear in the world can certainly brighten anyone's day while recording - quite literally so in the case of ISOPOP 24K Gold, the world's most exclusive pro-performance pop filter. But being one of the lucky few in the world to own one means being quick to grab one. It is, after all, a limited edition.

The limited-edition ISOPOP 24K Gold is available for purchase with a price of \$999.00 USD/€999.00 EUR via ISOVOX's growing global network of dealers and distributors or directly from ISOVOX's online Shop.
