

Sound Particles Spatial Music Bundle

Sound Particles, the software company that has been changing the paradigm of 3D audio software, is releasing a new plug-in bundle for mixing music in immersive – Spatial Music Bundle. This new bundle is the perfect toolkit to mix music in spatial and includes 5 plugins: Energy Panner, Brightness Panner, Space Controller Studio, Density and the newest product, Air | Music Edition.

Nuno Fonseca, founder and CEO of Sound Particles says: “We decided to create a bundle specifically for our music production audience so it’s easier for them to transition into the immersive world. Whether they’re working with stereo or spatial, the results are incredible. We believe this pack of plugins will empower their music to another level.”

Spatial Music Bundle is available starting November 16th on our website, and for the first five days it will have a 20% discount. The discount is available until November 21st.
