

Celestion G12M-65 & G12H-75

Celestion, a designer and manufacturer of guitar loudspeakers, well-known as the “Voice of Rock & Roll” behind many of the world’s most memorable guitar performances, announces the introduction of the new Celestion G12M-65 and G12H-75 Creamback, Two notes DynIR Collections.

The Celestion G12M-65 Creamback has fast become the new benchmark in guitar speaker tone. Put simply, it was built for players who love the familiar Greenback tone but crave a bolder low end. Expect a warm and woody G12M midrange, with a little added brawn.

The Celestion G12H-75 Creamback features a heavy magnet, which adds greater control to the Creamback sonic signature. This results in a tighter bass, punchier, more dynamic highs and adds a chorus-like thickness to single note lines.

These new DynIR cabinets are only compatible with Two notes Torpedo hardware and software. The Celestion Creamback Two notes DynIR collections include five cabinet configurations: 1×12 (both open and closed back), 2×12 (both open and closed back) and 4×12 (closed back,) available as standalone cabinets, as full cabinet collections, or as a combo collection of both the G12M-65 and G12H-75.

For a limited time through the end of March, Two notes is offering a special 30% discount on the Celestion collection of DynIRs and DynIR Cabinets.
