

## **sE Electronics sE4100 & T1**

Meet the sE4100 and T1, the latest additions to sE Electronic's renowned range of large-diaphragm true-condenser microphones. These cardioid-only versions of the multi-pattern sE4400 and T2 microphones come with the same sleek design and warm, smooth sound, making them an ideal choice for a wide variety of applications, such as drum overheads and guitar amps.

Featuring the very same hand-crafted twin 1" gold and titanium-sputtered brass capsules as the sE4400 and T2 – the sE4100 and T1 are true workhorses that deliver incredible results on a wide range of sources, from vocals to grand pianos, acoustic and brass instruments, to electric guitar cabs and percussion. Also available as factory-matched pairs, the sE4100 and T1 are rigorously tested, tuned in-house, and sonically matched – enabling a more comprehensive range of applications, such as drum overheads or spot miking to create an immersive stereo image.

## sE Electronics introduces the sE4100 and T1 Cardioid Condensers

Thursday, 18 January 2024 12:01

---

Hand-crafted with the highest attention to detail, built with dent-proof die-cast all-metal housing, metal switches, a rugged spring steel wire mesh grille, and premium finish. The sE4100 and T1 are roadworthy companions that are ready to handle the day-to-day life of touring professionals and years of demanding studio use. With integrated attenuation pads and low-cut filters, the sE4100 and T1 compensate for loud sources, easily taming excessive low-frequency rumble or proximity effect, providing the necessary extended dynamic range and roll-offs needed to dial in

your sound at its source.

Price and Contents:
