Best Service releases Quetzal, a Collection of Clay Flutes

Friday, 19 April 2024 19:28

Quetzal is the very first product specifically developed for the Engine Player, which Best Service are releasing under their new software brand Engine Audio. Building on our long-standing experience in sample library development, we have created a suite of innovative tools with Engine Audio that fosters the creativity of music producers, composers, and sound designers. The Engine Player is the core of Engine Audio and is a powerful platform for sample playback and sound manipulation.

Currently, Accordions Single Instruments and Organum Venezia are already available for the Engine Player. Users of these libraries will find an updated version in their Best Service customer account.
