Major Upgrade to Nomad Factory's 80s Spaces Reverb Plugin Version 2.4.0 released

Tuesday, 28 May 2024 19:19

Nomad Factory 80s Spaces Reverb Plugin Version 2.4.0

Nomad Factory and Plugivery Distribution announce a major upgrade to the iconic 80s Spaces Reverb Plugin, now available in Version 2.4.0. An introductory promo is actually running on the 80s Spaces plug-in at $29 (LIST $179) through authorized retailers worldwide and at $35 from the Nomad Factory website. The 80s Spaces Reverb Plugin now boasts a new Reverb Browser, providing access to all available Impulse Responses (IRs) and new options for filtering by Type, Time, or Model: Find the perfect reverb easily by filtering IRs based on type, duration, or reverb unit model. Select a reverb preset for your track and use the Reverb Browser to find the ideal IR that suits it while retaining the preset settings.

Version 2.4.0 brings a substantial expansion of our IR library and preset collection:

- 50 New Impulse Responses: Added from 3 renowned reverb units, increasing the total to 300 Impulse Responses across 15 meticulously recorded reverb models by audio expert Sabino Canonne at MoReVoX.
- 30 New Factory Presets: Also created by Sab at MoReVoX, resulting in a total of 510 well-organized presets.

A groundbreaking addition to Version 2.4.0 is the ability to synchronize the Pre Delay and Gate knobs to the BPM. This feature is a game changer for DJs and remixers, offering precise control over reverb timing. that makes it sound like a rhythmic "Beat Tone Shaper" for more dynamic and creative audio shaping.

80s Spaces v2.4 Changelogs:

- Added 50 impulse responses from 3 new models
- Pre Delay and Gate knobs are now synchronizable to the BPM
- Added 30 new factory presets
- Preferences are now updated instantly between all instances
