

EM Acoustics R4

EM Acoustics is set to make a triumphant return to ISE 2025, showcasing the entirety of its acclaimed Reference Series for the first time. This milestone marks the culmination of a transformative few years for the British loudspeaker manufacturer, which has seen significant growth and expansion.

Designed for exceptional performance and flexibility, the Reference Series has further strengthened EM Acoustics' reputation as a manufacturer of truly outstanding equipment. The R Series offers low-profile, full-range point source loudspeakers with impeccable frequency and phase response, making them a favourite among sound designers and AV integrators. EM Acoustics will launch the R4 at ISE 2025, a speaker developed in record time to meet urgent marketplace demand. This release marks the completion of the Reference series.

Joining the R5, R6 (right in picture), R8, R10 and R12, the R4 (left in picture) combines elegant design with powerful performance, delivering legendary headroom and exquisite musicality. At ISE, visitors can experience this flagship range in its entirety, witnessing first-hand why it has become the go-to solution of sound designers in theatres, live events and fixed installations.

"The Reference Series demonstrates the ability of EM Acoustics to design and engineer class-leading equipment," says Greg Clarke, Brand Manager. "It is highly unusual, in fact almost unheard of, for a manufacturer to have a such a deeply cohesive point source range. The unity of voicing across the series has allowed designers to create comprehensive single-manufacturer ecosystems that meet even the most demanding project requirements."

The full EM Acoustics management team will be present at ISE 2025, reconnecting with industry peers after a landmark 12 months. Following the official launch of the R6 at PLASA and a highly successful week-long demo event at its Surrey headquarters, the company has enjoyed record growth. Mike Wheeler, Operations Director, adds: "This has been another excellent year for us, with rapid, sustainable expansion and unprecedented demand for our products. ISE 2025 is the perfect stage to share these achievements and showcase the full potential of the Reference Series."

At ISE 2025, attendees will have the opportunity to explore the complete Reference Series and to engage with the team that has driven EM Acoustics' remarkable journey. EM Acoustics will be exhibiting in Hall 7 at booth 7H820.
