

NAD Electronics NAD CI S1, NAD CI SA2-120 & NAD CI PA4-60

NAD Electronics, a company with expertise in high-performance audio solutions, announces the debut of its groundbreaking Modular Series at Integrated Systems Europe (ISE) 2025, the world's premier exhibition for professional AV and systems integration. Attendees can visit NAD Electronics at stand 2H700 to experience this innovative lineup designed to redefine custom installation audio.

The Modular Series introduces three cutting-edge products that combine exceptional audio performance, seamless integration, and user-friendly design, all in a compact 1/3U width x 1U height form factor:

- NAD CI S1 Single Zone Streamer (left in picture above) – A versatile streaming solution for flawless music playback
- NAD CI SA2-120 BluOS Streaming Amplifier (center in picture above)– A powerful amplifier with BluOS integration for high-resolution multi-room streaming
- NAD CI PA4-60 4 Channel Power Amplifier (right in picture above) – A robust power amplifier engineered for superior efficiency and scalability

These products reflect NAD's unwavering commitment to innovation and high-performance solutions for residential and commercial audio. Tailored to meet the evolving needs of custom integrators, the Modular Series merges cutting-edge technology with NAD's minimalist design philosophy, delivering a streamlined approach for new builds and retrofits alike.

“These products are the first step in a new ultra-compact, scalable platform, designed specifically for the CI market. We approached this with a focus on rack efficiency & flexibility, while delivering advanced features and the audio quality that you'd expect from NAD” says Peter Gibb, CI Product Manager at NAD Electronics. “The new Modular Series will give integrators the tools required to meet the latest demands of audio system design, in any size or type of project.”

Part of the BluOS ecosystem, the NAD CI Modular series offers the same seamless interface for high-resolution music streaming and multi-zone audio management. BluOS is widely recognized for its stability, intuitive control, and integration capabilities with leading control systems, making it an ideal companion for NAD's latest offerings. The NAD CI Modular products are expected to start shipping in July 2025.

In addition to the new Modular Series, NAD's highly acclaimed CI DSP amplifier range has been updated with a new and improved UI. The CI 8-150 DSP, CI 8-120 DSP, and CI 16-60 DSP feature an intuitive dashboard that displays live status, perfect for remote checks. The updated Zones page allows easy grouping of channels, zone-specific sleep functions, and global input flexibility. The improved DSP section adds limiters, delay, and phase control, enabling seamless subwoofer integration. Additional upgrades include better layout, power management, password protection, reduced boot-up time, and enhanced third-party API integration with expanded remote monitoring.

Since its founding in 1972, NAD Electronics has set industry benchmarks by creating products that blend technological excellence with timeless design. The brand's ongoing commitment to sustainability, performance, and value continues to resonate with audiophiles and industry professionals worldwide. Join NAD Electronics at Stand 2H700 at ISE 2025 to explore the Modular Series and discover how NAD is shaping the future of high-performance audio solutions.
