

The image shows the front panel of the AudioControl Architect P250 EQ amplifier. The unit is black with a silver faceplate. On the left, the text "ARCHITECT" is printed in large, bold, silver letters, with "Model P250 EQ" and "2 Channel High Current Amplifier" in smaller text below it. On the right, the "AudioControl" logo is visible. In the center, there are three indicator lights labeled "Power", "Status", and "Protection".

The AudioControl Architect Model P250EQ features three selectable EQ curves to ease installation and setup efficiency while delivering a tailored, premium solution for each zone. Integrators can choose from Flat, Bass Boost or Bass/Treble Boost curves that have been engineered to enhance the performance of commonly deployed architectural loudspeakers.

AudioControl's SDS Priority Input Switching feature is accessible via a 3.5mm stereo input, facilitating the integration of smart doorbells, network-connected speakers and other devices that can pause/restart the entertainment content in selected zones as desired. The P250EQ features a signal-sensing circuit for auto-turn on/off when applicable.

AudioControl introduces the Architect Model P250EQ Amplifier

Montag, 06. Juni 2022 17:44

AudioControl has a 45-plus year history of creating award-winning products for integrators and backing them up with superior customer service as well as a 5-year warranty. Engineered and manufactured in the USA, the P250EQ amplifier is yet another example of a best-in-class product from AudioControl.

The AudioControl Architect Model P250EQ will be available July, 2022.
